## HOW TO MEASURE YOUR RING SIZE

The easiest way to find your ring size is to measure the inside diameter of a ring that fits you. Please follow the steps below to find your ring size.

1. Choose a ring that comfortably fits your finger.
2. Place the ring over the circles below until you find the best fit. Make sure you match the inside edge of the ring with the outside of the circle.
3. If your size falls between two sizes, choose the larger size, and send us a note notifying us to make it slightly smaller. We will be happy to make your new ring fit your size!

The ring sizes in the graphic chart are North American sizes. If you are familiar with your European size, please use the conversion table to find the North American equivalent.
